

Primary Build

SUSTAINABILITY

Primary Build is a leading supplier of steel structures and building materials, committed to promoting sustainability throughout our operations. We recognize the critical role we play in contributing to the construction industry's environmental impact and are committed to reducing our carbon footprint while delivering high-quality products and services. This white paper outlines our approach to sustainability and how we aim to achieve our goals.

01 Environmental Sustainability.

Steel is one of the most sustainable building materials available, with high durability, recyclability, and low carbon footprint. At Primary Build, we are proud to offer steel structures and building materials to our customers, supporting the use of sustainable construction practices.

We are also committed to reducing our environmental impact through our operations. By optimizing our supply chain, we can reduce transportation emissions and minimize waste. We use energy-efficient equipment and practices to reduce our energy consumption and greenhouse gas emissions. Our recycling programs ensure that all scrap metal and other recyclable materials generated from our operations are diverted from landfills and recycled into new products.

02 Social Sustainability.

We recognize the importance of promoting social sustainability by supporting safe and healthy working conditions for our employees and contractors. We prioritize safety by providing appropriate safety equipment and training to our employees and contractors. We also work with local communities to support initiatives that promote health and wellbeing.

03 Economic Sustainability.

We prioritize economic sustainability by maximizing efficiency and minimizing waste throughout our operations. Our streamlined supply chain ensures that we deliver all building materials to contractors on day one of construction, reducing delays and optimizing project timelines. By minimizing waste through recycling and reducing excess packaging, we minimize our environmental impact while maximizing economic efficiency.

« At Primary Build, we are committed to promoting sustainability throughout our operations by offering sustainable steel structures and building materials, optimizing our supply chain, and prioritizing social and economic sustainability. We believe that by promoting sustainable practices, we can reduce our environmental impact, support the well-being of our employees and communities, and deliver high-quality products and services to our customers ».
